

Cyclons

To use high-efficiency (99% / 10 μ) cyclons, multicyclons and separators, is recommended specially to avoid expensive maintenance operations in filters placed rearwards.

They do not include moving pieces so they are maintenance free.

Teyco Comercial, S.L. has its components approved under its quality system and under all categories of the directive 97/23CE.

Technical Features:

Design ASME VIII d.1 or AD 2000 Merkblatt

Working pressure 4 a 100 bar

Connections ANSI/DIN

- LIQUID SEPARATOR
- LIQUID AND SOLID SEPARATOR
