

Underground Modules

The underground modules of **Teyco Comercial, S.L.** are regulation and measure cabinets underground, to minimize the visual impact and the installation space.

The underground modules are patented by Teyco (nº:134415).

Teyco Comercial, S.L. has a flexible design to allow our production to satisfy our client's needs.

Incorporates inlet and outlet ventilations with gratings.

Normalised triangle locks or as demand.

Civil work is not necessary, only to put the module into a sand hole a little bigger than module for pipes introduction.

Technical data:

Inlet pressure: 0.5 to 16 bar
Outlet pressure: .02 to 6bar
Differential min: 0.5bar
Safety: Max/Min
Accuracy: RG 2.5 SG 5
Speed: Max 30m/s
Noise level: Max 50-70dB
Working Temperature: -20,+60°C

Maintenance:

Very easy access to all components independently.

As it has a 100% removable closure, all pipes remain accessible at 100%.

Options:

1 or 2 filtering and regulation lines
Counting
Outputs for telemeasure and
telecontrol.
Instrumental cabinets
Relief valve
Register
Data logger
Isolating joints
