

Vaporizers

Used to vaporize liquid gases. This operation can be done into the reservoir, but sometimes its vaporising capacity is not enough, then it is necessary to do this operation in an auxiliary place which can guarantee the necessary gas flow and quality to be constant avoiding destillation of different components.

This process can be attained by a heat change, using as heating fluid a mix of water and glycol.

The heat is delivered through the tubular part to the liquid gas allowing it to change its state.

Teyco Comercial, S.L. has its components approved under its quality system and under all categories of the directive 97/23CE.

Vaporizers are mandatory into the CEE countries.

vaporizers ranges:

TYPE	CAPACITY (Kg/h)	POT. MIN (Kcal/h)	Φ BODY (mm)
TEYCO 700	4000	420000	711
TEYCO 600	3500	380000	610
TEYCO 550	3000	320000	558
TEYCO 500.1	2000	210000	508
TEYCO 500.2	1500	160000	508
TEYCO 400	1000	110000	406
TEYCO 300.1	750	80000	323
TEYCO 300.2	600	70000	323
TEYCO 250.1	500	55000	273
TEYCO 250.2	300	35000	273
TEYCO 200.1	200	22000	219
TEYCO 200.2	150	17000	219
